

NEBOSH National Certificate in Construction Health & Safety

Course Introduction

NEBOSH is the awarding organisation of choice for Health & Safety Professionals. The NEBOSH National Certificate in Construction Safety has become one of the most recognised and sought after qualifications in the construction industry. It shares the NGC1 common module with the General Certificate but includes an additional week's learning to cover the higher risks associated with construction operations. The 'Construction Certificate' is divided into 3 units, NGC1, covering Health and Safety Foundations, Law and Management Systems, NCC1 covering the control of workplace hazards in the construction environment and NCC2, a work-based practical assessment consisting of a site inspection and report.

Course Topics

- Foundations of Health & Safety
- Health & Safety Management Systems
- Health & Safety Culture
- Monitoring, Review & Audit
- Accident Investigation & Reporting
