

NEBOSH Certificate in Environmental Management

Course Introduction

NEBOSH is the awarding organisation of choice for Health & Safety Professionals. The NEBOSH Environmental Certificate acts as the perfect addition to the Oil & Gas, General and Construction Certificates to help your understanding of Environmental Management Systems. In today's competitive job market many Health and Safety Management roles include the additional responsibility of looking after, improving and maintaining an organisation's environmental interests. In completing this qualification you will be able to demonstrate the knowledge and know-how to perform such tasks. This qualification is taught over 5 days as a stand-alone qualification but is typically completed in addition to a relevant Health and Safety qualification.

Course Pre-Requisites

[Please be sure you are available to also sit our NEBOSH Examination days.](#)
